

Dementia Friendly Tempe Presents

2nd Wednesday of each month
1-2:30pm

Webinar

Dementia Friendly Tempe presents an online monthly series of FREE education lectures to raise community awareness of memory loss conditions and help families access available resources.

November 18, 2020 Ask the Doctor Any Question about Dementia (Dr. Ed Perrin)

The average visit with a physician in the U.S. is only about 7-minutes so many questions go unaddressed when there are a multitude of health concerns all presenting at one time. This session provides a relaxed setting to ask Geriatrician, Dr. Ed Perrin, any question you may have about dementia and other chronic health concerns. **Note, this session does not replace the medical advice you receive from your own medical provider.

December 9, 2020 Visiting Notes for Family and Friends (Jan Dougherty, MS, RN, FAAN)

With the holidays fast approaching, family and friends will convene in person or over the phone for visits. However, for those living with dementia, communication may be changing making family and friends more uncomfortable and less likely to try to connect with the affected person. This presentation will provide numerous strategies to keep connections alive and successful between visitors/callers and the person living with dementia.

**Classes are free but registration is required.
